

# Break free from costly, outdated storage hardware and HSMs

Versity and Spectra Logic have teamed to provide a comprehensive archiving system for data-intensive industries such as high performance computing, media and entertainment, genomics and medical, and oil and gas. The joint solution creates an automated, policy-based, tiered storage system that links tier-one storage to archive storage. We are mutually focused on working with our customers and their unique needs and are dedicated to advancing our technology strategies to align with their requirements.

## Versity Storage Manager

Versity Storage Manager (VSM) is an enterprise-class HSM data archiving solution on Linux. VSM is based on the open source SAM-QFS technology from Sun Microsystems and provides a comprehensive high-performance data management system for Spectra Logic Data Storage Solutions. Versity provides maximum data protection at a minimum cost.

VSM supports massive storage volumes and offers the most robust archive policy engine on the market. With no contractual or technology lock-in, no up-front license fees, and open source data formats, Versity gives you the freedom to control your own destiny. Versity works with you to establish, tune and maintain a highly functional archive program with an innovative direct support model that guarantees unfiltered access to its entire team of software engineers.

### An HSM that knows what you need and delivers what you want:

- Archiving software is our sole focus
- Subscription software model – no up-front fees
- Perpetual, free license to read back your data
- Direct engineering support
- Open source data format

## Spectra Logic® Data Storage Solutions

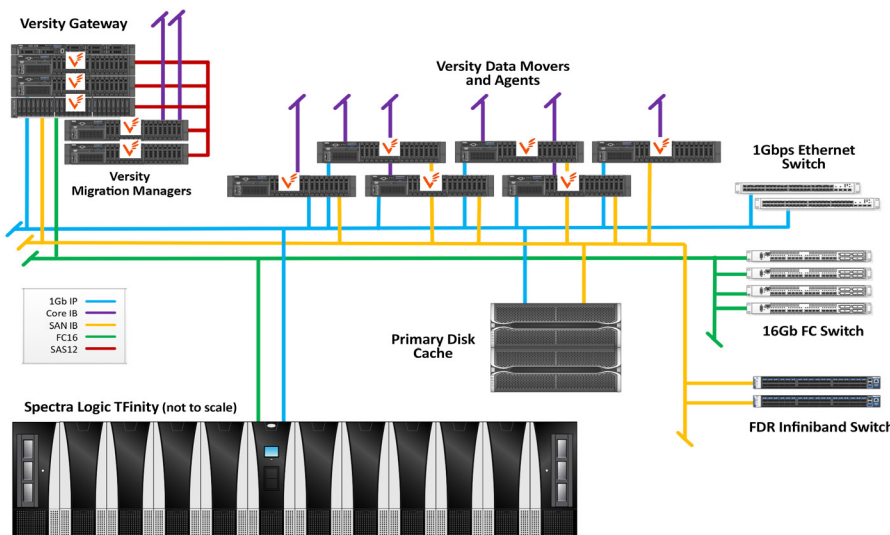

Spectra Logic develops data storage solutions that solve the problem of digital preservation for business and technology professionals dealing with exponential data growth. Spectra Logic and Versity scale to the largest data storage solution on the planet, provide the lowest total cost of ownership, and offer the reliability and support that keeps customers satisfied.

Spectra enables affordable, multi-decade data storage and access by creating new methods of managing information in all forms of deep storage—including archive, backup, cold storage, public cloud and private cloud.

### Impressive flexibility with limitless possibilities:

- Supports tri-media: LTO, IBM® TS11XX, Oracle® T10000
- Expands from 50 to over 427,000 LTO slots, 325,000 TS11XX technology slots, or 337,000 tri-media\* slots
- Easily grow to 12 exabytes of compressed storage
- Occupies up to 71% less floor space than other libraries
- Remote management through a secure web interface

\*Tri-media = partitions of LTO, TS11XX, T10000 media

“ Customers looking for an alternative to their existing Oracle environment can rely on Versity and Spectra to provide them with a best-of-breed storage solution. Both companies are devoted to delivering an affordable, enterprise-class, tiered storage solution with world-class support.”

- Harriet Coverston  
CTO & Co-Founder, Versity
